### Fast Start Services: Developing Data Integration Applications Quickly and Cost-Effectively

**Implementing a new data integration solution of any scope – from enterprise wide solutions down to development or modification of specific applications – can be challenging. DMX Fast Start Services help you meet that challenge. Designed for new DMExpress customers or new applications, DMX Fast Start Services will get you started in a fourth the time otherwise required, double or triple application performance, and build the foundation you need to operate, maintain, and expand your system for years to come.**

#### Work with World-Class Deployment Specialists

Highly experienced DMExpress deployment specialists work with you onsite to guide DMExpress administrators and ensure high-performance application design and reliable operation. At the end, you will have a firm command of your DMExpress applications and will employ best practices for maintaining them.

DMExpress Fast Start engineers have seen it all and know DMExpress and data integration strategies inside out. They can help you complete the job in a fraction of the time otherwise required.

***"Thanks again for offering the out-of-the-box solution that this session gave us. I think the net result will be a much deeper utilization of the DMExpress product with far less effort than I had previously anticipated."*** – IT consultant to Fortune 500 companies.

#### Training

Training is an integral part of Customized Services and is a prerequisite for the Fast Start program. Whether Classroom or Onsite, DMExpress Training Services provide you with a solid foundation for utilizing basic operations and advanced features of DMExpress.

DMExpress Training Services also provides you with valuable tips and best practices guidance, not included in the set of best practices covered during Fast Start visits. This information will enable you to maximize the benefits from

DMExpress Fast Start Services. For more information on training, contact your DMExpress account representative.

#### Fast Start Activities

Expert Fast Start engineers will provide services to deploy your application quickly and efficiently, including:

- Review existing environment
- Configure DMExpress in your environment
- Train you hands-on to build, management, and monitor specific applications
- Work with you onsite to monitor your management of your DMExpress application, and make recommendations as necessary

Since applications and the DMExpress capabilities best suited for them will vary, Fast Start activities can be adjusted accordingly.

Onsite time required with DMX Fast Start Services is 1 to 5 days, depending on your environment and the size and complexity of your project. For larger projects, consider DMX Customized Services. Contact your DMExpress representative to work out a plan suitable for your enterprise.

### Key Benefits

- **Save time**
- **Maximize use of existing hardware**
- **Minimize consultant costs**
- **Reduce work effort**
- **Increase overall application throughput**

## Fast Start Services: Developing Data Integration Applications Quickly and Cost-Effectively

### Syncsort Best Practices Generate Quantifiable Benefits

Expert Professional Services engineers who specialize in DMExpress Data Integration and ETL deployments, work directly with you to ensure your implementation fully leverages our **Syncsort Best of Breed Performance Methods**.

Regardless of the size and complexity of your application, or the experience level of your personnel, DMExpress Professional Services can deliver **significant cost savings** \*:

- Save at least 50 % on excessive system integrator and overall consulting costs.
- Reduce implementation worker-days, and go to production in less than a third the time.
- Learn ways to free up your resources for other processes. Generate more application output in less time, more than doubling the return on your investment in DMExpress.
- Increase your team's productivity level significantly. Save at least \$18,750 per year per developer.

\* Cost savings assume a conservative time savings of 1.5 hours per day, an hourly rate of \$50 and 50-work-weeks per year. Projected savings will vary with these parameters.

## Start the Partnership for Excellence

**DMExpress Services include four components:**

- **Training Services**
- **Professional Services**
- **Performance Assessment**
- **Support Services**

### About DMExpress

DMExpress™, Syncsort's latest innovation, is the high-speed solution to your data management performance challenges. DMExpress speeds ETL, data warehousing, BI, and other large volume applications. For UNIX, Windows, and Linux, DMExpress integrates disparate data from multiple, heterogeneous sources. It transforms and aggregates the data at high speed to create consolidated views for reporting, analysis, or other downstream applications.

### About Syncsort

Syncsort Incorporated develops, markets, and services high-performance software for data management and data protection. With emphasis on technical excellence and superior service, Syncsort products are assisting customers worldwide to realize the performance potential of their data processing systems.
